DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for providing access to secure data through an established connection between a portable computing system and a base computing system within a specified time. More specifically, independent claim 1, and similar claims 7, 16, 29, 35, 37, and 44 identify the uniquely distinct feature: resetting a timer within said portable computing system to run for a specified time and providing access to said secure data only when said timer is running. The closest prior art, Varadharajan, et al. in US Patent No. 5887063 discloses a direct establishment of communication between a portable device and a host device; however an activation means disclosed by Varadharajan which facilitates the establishment of the connection fails to discuss the timer feature of the present invention. The prior art, taken alone or in combination, fails to anticipate or fairly suggest the limitations of Applicant's independent claims in such a manner that a rejection under 35 USC 102 or 103 would be proper. The claims are therefore considered to be in condition for allowance as being novel and nonobvious over the prior art. As such, claims 1 – 49 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
